DIOGO CORREIA

Data Engineer | AWS Solutions Architect | Python & SQL

+351 927582849 diogoc1608@gmail.com Linkedin Portfolio Portugal, Santo Tirso

SUMMARY

Data engineering professional with almost 3 years of experience in designing and maintaining scalable data pipelines and cloud-based data platforms, expert in Python and SQL. My key data engineering achievements include achieving 95% data accuracy across 20TB using quality checks, and reducing pipeline processing time by 30% by deploying Terraform on AWS. Seeking a Data Engineer position where I can work in a multinational environment and foster personal and organisational growth.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate ®

AWS Certified Cloud Practitioner ®

KEY ACHIEVEMENTS

Data Quality Enhancement

Achieved 95% data accuracy across 20TB using quality checks.

Cloud Optimization Success

Reduced pipeline processing time by 30% deploying Terraform on AWS.

Model Optimization Impact

Improved data model performance by 40% for analytics.

Database Efficiency Boost

Increased report delivery speed by 50% with dynamic SQL databases.

EXPERIENCE

Data Engineer

Critical TechWorks

11/2023 - Present Porto, Portugal

- Design and maintain scalable data pipelines for batch and real-time data processing
- Develop and optimize process mining data models for analytics and performance
- Implement data quality checks, validation, and monitoring
- Process large-scale datasets using Apache Spark and Big Data tools
- Build cloud-native data architectures on AWS using Terraform (IAC)
- Apply CI/CD and DevOps best practices in an Agile/Scrum environment

Data Analyst

Parsuk

03/2022 - 12/2022 Porto, Portugal

- Transformed and processed large datasets related to research funding and outputs
- Designed dynamic SQL databases for KPI analysis
- Collaborated with stakeholders on backlog management and reporting
- Created dashboards, reports, and data visualizations

TRAINING / COURSES

Data Academy
